

DC Feeder Upgrade Project – Newtown

Power Supply Upgrade

January 2024

Transport for NSW acknowledges the Gadigal people of the Eora Nation as the Traditional Custodians of the lands on which we work and pay respects to Elders past and present.

Transport for NSW is making improvements to electrical infrastructure to meet expected power requirements for Sydney's future rail network and new fleet of air-conditioned trains. As part of this, Transport for NSW is carrying out power supply upgrade work through our DC Feeder Upgrade Project.

What work are we doing?

The DC Feeder Upgrade Project will improve power delivery to the railway across a number of sites on the rail network, including Newtown.

In January we will carry out testing on electrical infrastructure such as cables and overhead wiring structures.

When and where we'll be working

Standard construction hours are **7am to 6pm Monday to Friday and 8am to 1pm on Saturdays**.

Work will take place inside the rail corridor in Newtown near Bedford Street (between Albermarle and Baltic streets) as shown overleaf.

We will use the rail access gate on Railway Avenue in Stanmore (between Warwick and Durham streets) to enter the rail corridor. You may also notice deliveries of machinery and equipment to this area.

Out of hours work and deliveries

Some work will take place outside of standard construction hours from **10pm Tuesday 30 January to 6am Wednesday 31 January 2024**.

Out-of-hours work will take place during a scheduled Sydney Trains trackwork period when no trains will be running.

In connection to the work, there may be an out-of-hours delivery and pick up of machinery near the site access point on Railway Avenue between **6pm Tuesday 30 January and 7am Wednesday 31 January 2024**.

What will this mean for you?

There will be temporary parking changes on Railway Avenue, Stanmore. Up to three parking spaces next to the site access point will be temporarily unavailable from **7am Tuesday 30 January to 6pm Wednesday 31 January 2024**. This is to allow for the delivery of machinery and equipment.

In addition to the parking changes you may notice:

- workers and heavy vehicles
- noise from machinery and equipment
- temporary lighting towers.

Managing our impacts

We understand construction activities may cause disruption for the community. We'll seek to minimise potential impacts as much as possible and adhere to strict environmental conditions relating to noise, vibration and dust management.

There's a lot happening

Currently there are multiple project teams, transport agencies and contractors working within the rail corridor. For more information on work being completed by Sydney Trains, please phone 1300 656 999 or visit www.transport.nsw.gov.au/sydtraincommunity
